

Author and subject indexes for the *Journal of the Association of Chartered Physiotherapists in Women's Health*: 2000–2010

Introduction

The following author and subject indexes are for articles and papers published in the *Journal* between Spring 2000 (No. 86) and Spring 2010 (No. 106). Table 1 lists the definitions of all abbreviations used.

A chronological index of this material is now available online in the form of a downloadable Microsoft Excel spreadsheet. This electronic document can be searched using keywords, terms appearing in the titles of the contributions or the names of authors. This makes it possible for you to identify which edition of *Journal* contains any particular paper that you are searching for, and it will also enable a search for all articles on any given topic.

To make a search:

- select the 'Edit' toolbar and click on the 'Find ...' option, which is indicated by the binoculars icon;
- click 'Find' and type in your search term into the blank field; and then
- click 'Find All'.

A list appears of all locations in the index containing that term. Highlighting an entry in this list will also outline the entry with a black box at its location in the index.

The online index will be updated as each new edition of the *Journal* becomes available. The contents of back issues published prior to 2000 will also be added over the coming year.

Karen Radford
Websites Editor

Table 1. Alphabetical list of abbreviations used in the author and subject indexes

Abbreviation	Definition
ACPWH	Association of Chartered Physiotherapists in Women's Health
CDH	congenital dislocated hip
EBP	evidence-based practice
HIV	human immunodeficiency virus
HRT	hormone replacement therapy
IBS	irritable bowel syndrome
ICIQ	International Consultation on Incontinence Modular Questionnaire
ICS	International Continence Society
LUTS	lower urinary tract symptoms
MDT	multidisciplinary team
MS	multiple sclerosis
MUI	mixed urinary incontinence
NMES	neuromuscular electrical stimulation
OAB	overactive bladder
PfMs	pelvic floor muscles
PfMEs	pelvic floor muscle exercises
PRPGP	pregnancy-related pelvic girdle pain
PTSD	post-traumatic stress disorder
QoL	quality of life
SPD	symphysis pubis dysfunction
SUI	stress urinary incontinence
TENS	transcutaneous electrical nerve stimulation
TOT	transobturator tape
TVT	tension-free vaginal tape
UTI	urinary tract infection
UUI	urge urinary incontinence
