

Trent area report – Autumn 2019

Presently Trent comprises of 34 members, spread over a large geographical area.

The spring meeting was kindly hosted by Kate Stower at Nottingham City Hospital earlier this month. Kate gave an excellent presentation on feedback from BSSVD conference

9 attended, this was well attended compared to previous meetings. This was possibly due to it being linked to IST at Nottingham and being held prior to the vulvodynia special interest group meeting.

Linking to other meetings or training of interest could boost attendance. We plan to email members to see if anyone else is happy to host a future meeting.

We are planning to continue with 2 meetings per year, Spring and Autumn 2019.

We discussed at the meeting whether a study half day would be another way of encouraging more members to attend. We plan to trial this at the Autumn meeting.
